PortaBilling® Oracularius: Architecture

- 3 servers for the “billing engine” software package: RADIUS server, real-time billing engine, etc.
- 3 servers for the database cluster software: Oracle database server, Oracle RAC, and other database options
- 2 servers for web administration, statistics calculations, XML API, etc.
- 1 server for configuration, maintenance, and management tasks
- Fully integrated with PortaSIP class 4/5 softswitch, PortaUM and PortaBridge media servers for hosted IPPBX services
- Virtually unlimited scalability just by adding nodes into the cluster: bundle of a billing server and a data base server
