

# MVNO & IoT/M2M Cloud Billing

A easy-to-use, flexible, end-to-end cloud-based billing and service management platform for MVNOs and IoT/M2M projects

## Monetize your services faster than ever before!

### In hours

With thousands of out-the-box features, your bright new idea can be configured and production-ready in hours

### In days

Our open architecture and API allows you to integrate with external systems using simple low-code programming

### In weeks

Need to add totally new functionality? Order it and we'll deliver via our 7-week agile development cycle

## Let's compare

### PortaBilling

### Black box BSS

Feature wait time

A few months or less

Potentially years

Customization cost

Always fair pricing

Beyond your control

Pricing structure

Unlimited license with all features included

Complex, confusing, with hidden fees

Freedom

API, low-code tools, and full source code access

Closed architecture means no guarantee of success

**PortaBilling**

End-to-end service monetization solution for telecom service providers

**Deployed by over 500 customers in 100+ countries**

**Pure profit**

Unlimited customers, products, SIM cards, or IoT devices

**Instant deployment**

Typical deployment time: 24 hours to access your billing in the cloud (rather than weeks)

**Freedom to innovate**

Ability to create a perfect product-market fit by integrating PortaBilling with other systems

**Flexible scalability**

Choose your ideal processing capacity and increase it on demand at any time

**Uninterrupted service**

Zero downtime during updates with geographic redundancy across the globe

**Features our customers love!**

Real-time rating, bundles, discounts, recurring charges, invoicing

Open architecture, source code, REST API for external system integration

24/7/365 technical support with new features updates every 7 weeks

Unlimited perpetual license or SaaS subscription in the cloud

Voice, video, IoT/M2M, SMS, data, VAS, IPTV, MVNO/E

IoT Billing
