

Case study: Integrations with Mobile Networks

Oleg Shevtsov

Senior Project Manager

Mobile economy grows steadily

Data Connectivity is now a *commodity*

Applications, platforms and services:

- Create value
- Increase revenue

Price is still important: PortaBilling makes you competitive

Why our customers get to mobile world

Connectivity will be commoditised; value generation lies in the applications, platforms and services layer

\$754br \$176bn 70% 60% 50% 40% \$299bn \$66bn 30% 20% \$25bn \$51bn 10% 0% 2018 2025

Percentage of total IoT revenue

Applications, platforms and services

(which includes cloud data analytics and security) is the key growth area of IoT

Professional services (encompassing systems integration, consulting and managed services) will increase in share, fuelled by the continued digitisation of industries

Connectivity will commoditise and decline in share, making it difficult for operators to compete on the data pipe alone

Infographic by GSMA Intelligence 2019

PORTA ONE

Australian Service Provider MNO: Optus MVNE: ECConnect

Integrations:

- Mobile Core provisioning
- CDR Mediation
- File processing CDRs, MURs, Location update

Challenges:

- Asynchronous provisioning
- Delayed CDRs for Voice, SMS, VAS
- Missing location update events
- VPN setup could take weeks

PortaOne approach:

• Agile

PortaSwitch Components used:

- PortaBilling
- CDR Mediation
- External Systems
 Provisioning Framework
- PortaBilling API
- PortaSIP / IMgate for SMS

Project timeline

Thank you!
