

Sharing some Thoughts

The Company – A Snapshot

- Datora provides Voice Termination, Transport and Hubbing based on Voice Over Internet Protocol (“VoIP”) to both international and domestic telecom carriers. It currently holds regulatory authorizations for Fixed Telephony, Long Distance & Value Added Services in Brazil, the USA and other countries where it has presence
- Datora Mobile holds a valuable **RV-SMP authorization**, which was acquired in late 2011 with the objective of establishing a robust Brazilian M2M/IoT *Open Ecosystem and Platform*. Today, Datora Mobile has over **900 Enterprise customers (B2B)** and over **800k M2M connections or Lines in Service**

#1
Datora is the 1st in Latin America and 3rd with VOIP technology in the World

Brazilian regulatory authorizations for:
