

Hosted IP PBX features: Options for staying on a roll

Yulia Borshch

Application Support Engineer

What is Hosted IP PBX solution?

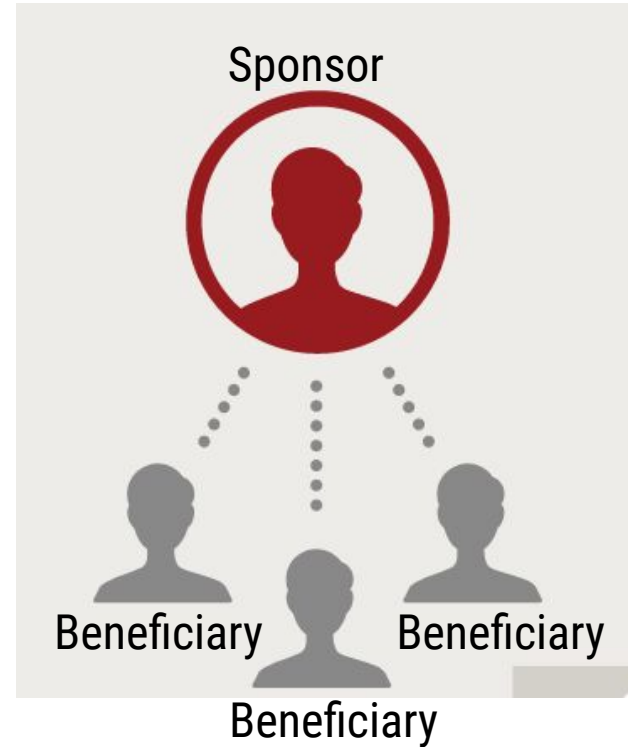

- Mobile centrex solution to become an MVNO based on IP centrex solution
- IP Centrex calling features on mobile network:
 - voice calls
 - follow-me call forwarding
- Mobile phones become IP centrex endpoints

Benefits:

- Attractive service that addresses modern business needs
- Deliver a converged Mobile and IP Centrex solution to your customers & increase service offerings and revenue potential
- Provide 4G/VoLTE quality in communication
- Integration of IP Centrex services into the application via API

- Allow IP Centrex users to share bundled minutes between Auto Attendant and selected user
- All charges are applied to sponsor account
- Individual service configuration for beneficiary accounts

- Save time *and* let your customers pay their total service usage charge in one operation
- Total charged amount for all of the company offices

Thank you!
