

On-demand VoIP transcoding in PortaSwitch

Alexander Zalugovskiy

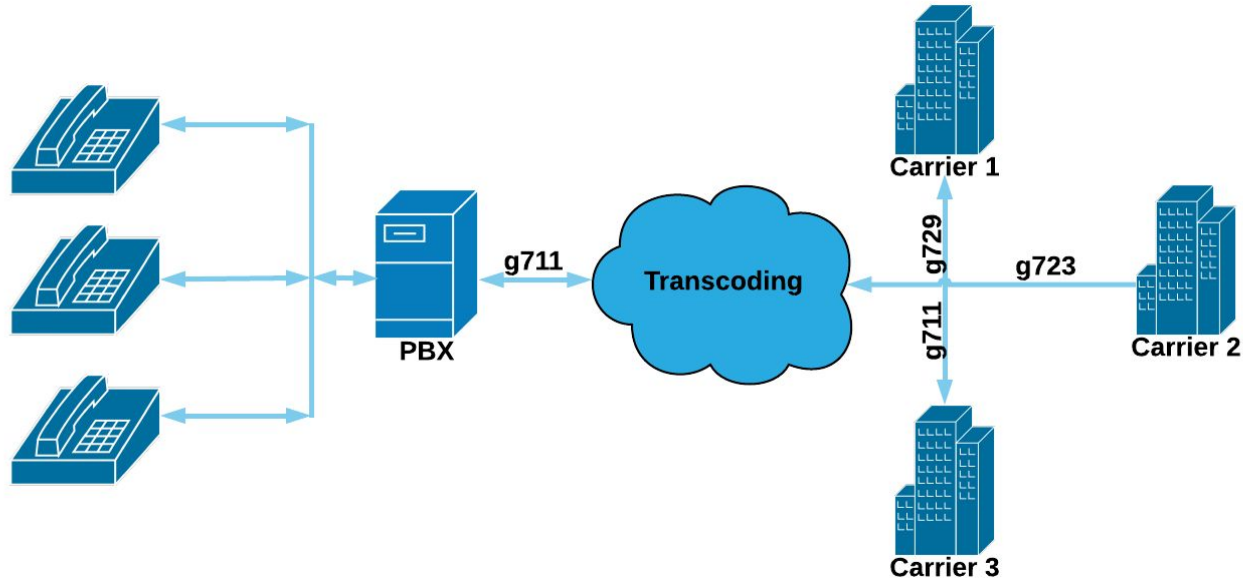

Support TeamLead

Mass-scaling of mobile apps with free codecs

- Reduce the costs of codec royalties for mobile apps
- Seamless VoIP calling experience for your customers

Harmonization of SIP trunks

- Integrated transcoding capabilities guarantees interoperability with any PBX solution/carrier

Expected performance

- 400+ simultaneous conversions per server
- Overall performance depends on the HW specs and used codecs

- Available in MR71 (July 2018)
- Part of PortaSIP component
- Support for opus in MR73+ (October)

Roadmap

Thank you!
