

# On-the-spot functionality verification tests

**Volodymyr Vasylenko**

Deputy Support Team Lead

# Basic set of tests

## Automated tests for:

- Registrations
- Calls
- Rejection IVRs
- Voicemail

## Manual checks:

- SIP & BE logs
- Monitoring data

## Services verified via these tests and checks:

- [PortaSIP](#)® / PortaSIP® Cluster
- Billing engine
- Database
- Web interface
- Log viewers

# Extended set of tests

By request, we can extend a [basic set](#) with extra tests.

## Examples:

- Attendant transfer & call pickup
- Testing custom (uploaded) prompt via Auto-Attendant
- Calls to external number

# Summary

- We perform functionality tests after [maintenance](#) (i.e. configuration change or software upgrade) to ensure system stability
- We use our standard set of tests
- We can extend this set upon request

Thank you!

**Volodymyr Vasylenko**

Deputy Support Team Lead
