

# Service resiliency with DSBC

**Mike Kidik**

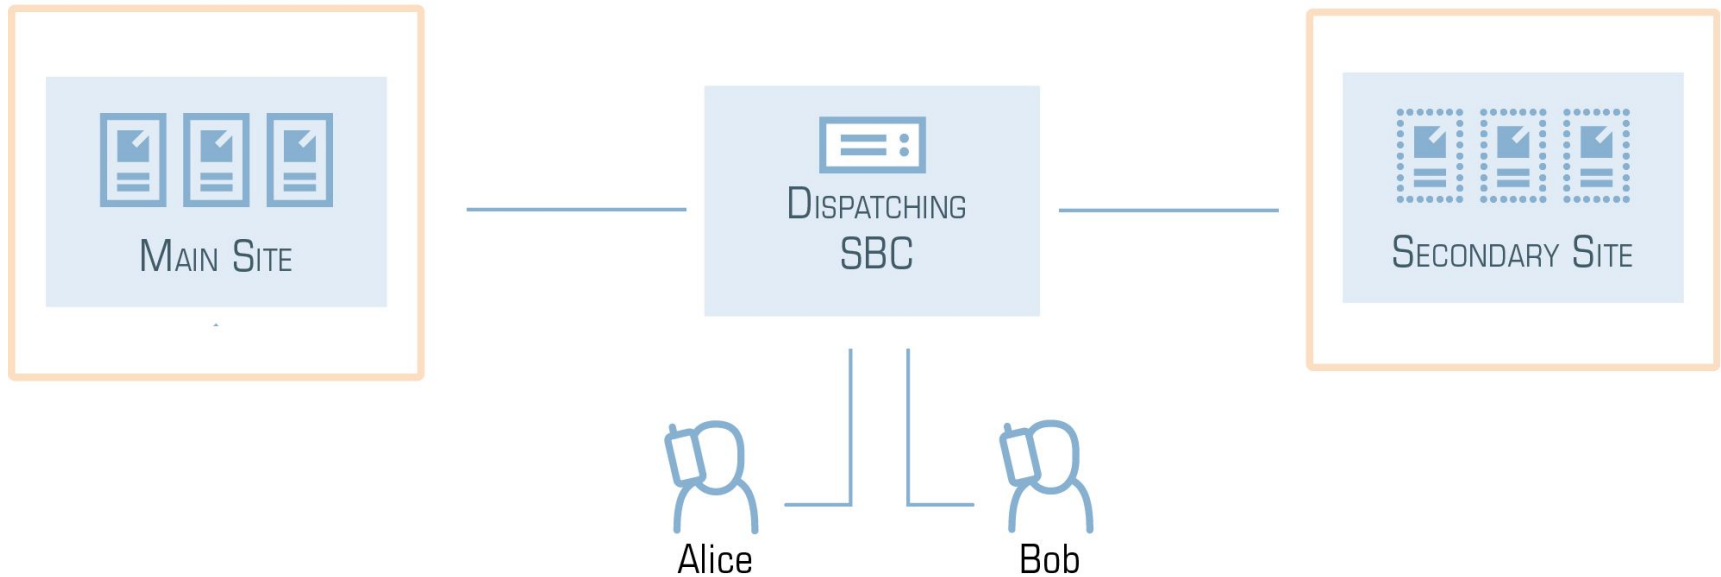

VP of Project Management

# DSBC as dispatching point

- Single IP for all CPEs
- Call distribution among PortaSIPs
- Standby SBC for redundancy
- Deployed on premise or in the cloud

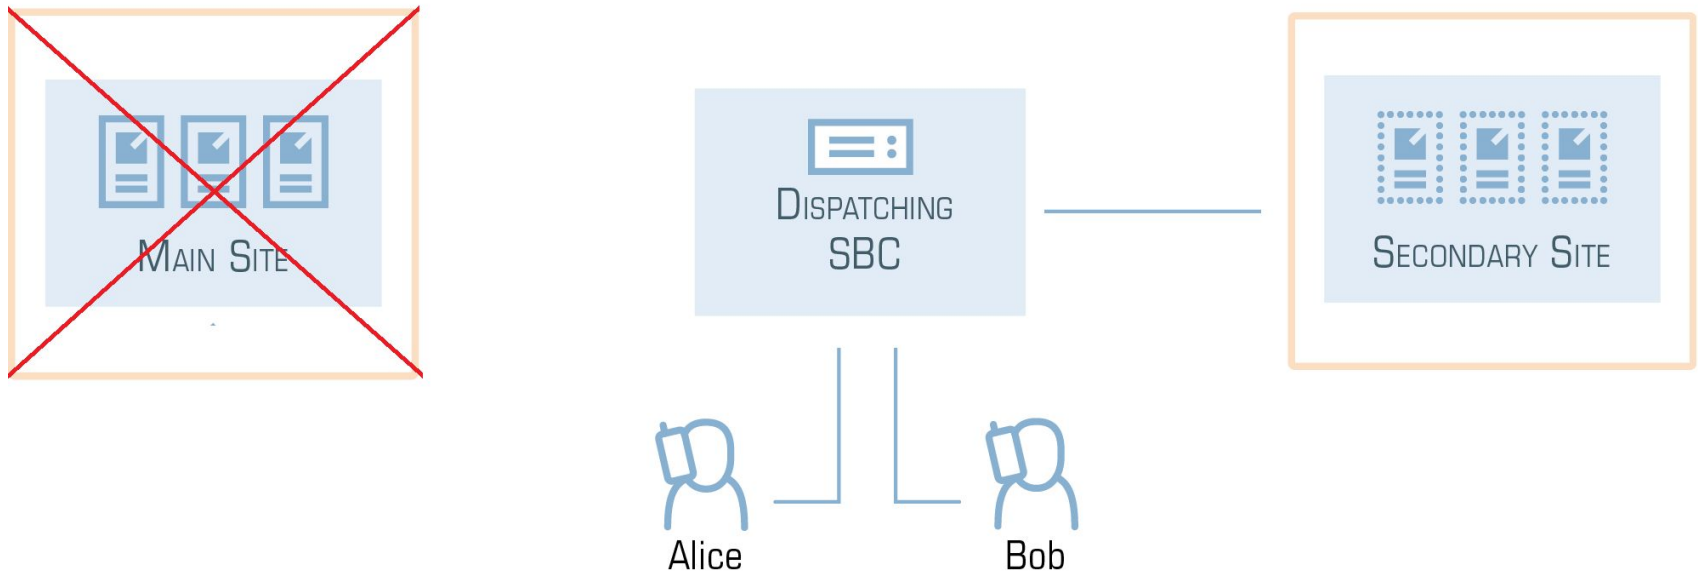

# Service resiliency with dual sites

Calls are handled normally by both sites

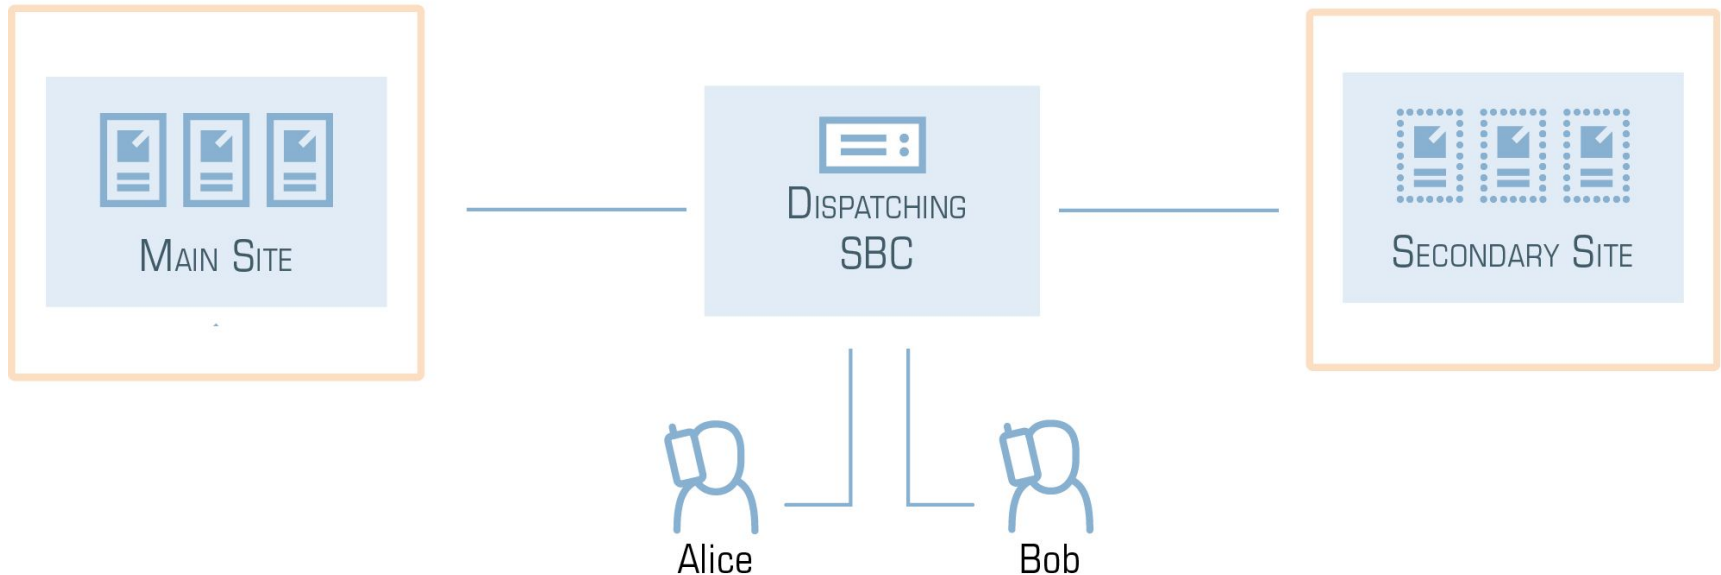

# Service resiliency with dual sites

If one site fails or undergoes maintenance,  
SBC sends calls to another site

# Service resiliency with dual sites

Once the maintenance is over, calls are handled normally by both sites

Ultimate  
solution for  
service  
resiliency

- Uninterrupted service
- Simplified CPE configuration
- Deployed at any site or in the cloud
- Additional SBCs for redundancy

Thank you!
