## *telinta.com/solutions/webrtc*

The screenshot shows a web browser window displaying the Telinta WebRTC demo page. The page has a dark theme with a sidebar on the left containing navigation links for Business, Consumer, Mobile, and Wholesale. The main content area is titled "WebRTC Demonstration" and includes a text block about the service. A "Related Solutions" section is on the right. A white call overlay is centered on the screen, featuring a phone dial pad, a "Destination" input field, and a "YOUR LOGO" placeholder. The overlay text reads: "Welcome to this demo of our brandable WebRTC solution for VoIP service providers. This demo is currently configured for test calls to destinations in the US. Please enter 1 plus the area code and phone number you would like to call. Want to learn more? Contact us today." The overlay also includes a "LIVE CHAT" button on the right side.

Inbound / Outbound  
Calling

## *Inbound Calling*

- Open or running in background
- Customizable ring tone
- Browser tab begins to blink
- Web push notifications
- Both PSTN and “on-net” calls

# Brandable and Customizable

- Your domain
- Your design
- Your logo
- Your language
- Your ringtone
- Your configuration
- Your resellers and sales channels

# WebRTC in PortaOne Account Self-Care

A screenshot of a webRTC interface. On the left, a "Dialer" window is open, showing a numeric keypad (1-9, \*, 0, #) and a green "Call" button. Below the keypad, it says "Online". The main interface has a header with "YOUR LOGO" and a mobile phone icon. Below the header, there are tabs for "IP Centrex" and "Products Configuratio". A status indicator shows "Offline". At the bottom, there are sections for "Contact Information" (with fields for Contact, Address, Email) and "Member of Huntgroups Information" (with a table showing "1 Ring All group").

- Can be integrated into any interface.

# WebRTC in Virtual Office

**Tools**

- + Add Tool
- Send Fax
- Sent Faxes
- Recorded Calls
- Recorded Conferences
- WebRTC**
