Conclusion: Transformation into a Future-proof CSP

Andriy Zhylenko

CTO

Looking back: last 12 months

- GDPR Compliance
- PortaSIP: call control API, IMS TAS
- New GUI
- Dual-version: first migrations underway
- IoT integrations (Cisco Jasper, etc.)
- Mobile core partnerships (Protei, etc.)
- PortaSwitch in the cloud: 10+ customers

- Oracle Cloud
- Oracle RAC (BYOL)
- Dynamic Orchestration

**PortaSwitch Cloud: What's on the horizon?**

What's next?

What we see as critical focus areas for CSPs

- UCaaS / Mobile Apps
- IoT
- MVNO / Wireless data (5G / LTE / ...)
- Cloud deployments

Agile CSP Eco-System

Integration Scheme

Methods of integration

Adherence to integration guidelines (eTOM, etc.)

- PortaBilling API
- ESPF ("push" to external system)
- Unified Web UI (data consolidation plugins)
- Standard protocols (e.g., Diameter)

Strategic technology partnerships

Pre-integrated "default" options for key areas

- Mobile Apps (PortaPhone)
- Network core
- CRM
- Business Analytics

Or choose your own!

Building The Future

Together

- Keep the sync
- Enhancements of core functionality
- Extending eco-system

Thank you. See you here in 2019!
